

5th December 2023

Dear Parent/Guardian

Following the November exams we would like to remind you about our academic tracking programme.

Academic tracking

There is a committed team of staff with responsibility for overseeing all students' academic progress through data analysis, systems and staff collaboration. Students who are not achieving their academic potential are identified and a range of interventions are implemented to assist the student to overcome their academic difficulties. This programme is available to all students.

Should an identified student require additional support in reaching their academic potential they will meet with a member of the academic tracking team and, with input from their subject teachers, a plan will be implemented to support the student's progress and address the academic difficulties that the student may be encountering. A teacher is available every day after school to meet identified students to assist them to address challenges and provide that extra help where possible.

Academic tracking gives the student an opportunity to reflect on their learning and provides them with encouragement and advice on how to work more effectively and how to improve their grades. 2nd, 3rd, 5th & 6th Year students have an academic progress booklet which helps them to monitor their progress and identify areas for improvement under the direction of their subject teachers, form teachers and Year Head.

Academic tracking encourages the student to develop ownership over their learning experiences and realise their full potential. Following on from the feedback your daughter has received regarding the exams if you feel that your daughter requires

further intervention to improve their academic performance please contact the tracking team via the email tracking@olschool.ie stating your daughter's name and the specific issue(s) that she is having around academic subjects.

Yours sincerely

Marguerite Gorby

Principal
